## Phyllis Green & David D. Green Medical Office Buildings (Westminster, MD)

DDC inc. served as civil engineer and landscape architect for these two medical office buildings in Westminster, MD. DDC staff offered professional expert testimony for both projects at zoning hearings in order to secure approval for medical buildings (conditional uses in the zoning district) on the project sites, and then prepared construction and permitting drawings for both facilities.

Together, the facilities provide approximately 130,000 s.f. of condominium medical office space. The Phyllis Green Medical Center was opened in 2005 and the David D. Green building was completed in 2010.
